## Statement REACH Regulation

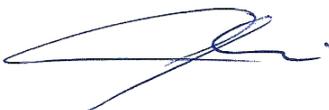

Habia Cable is aware of the European regulation, 1907/2006, Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) and will continuously work to ensure our compliance within this legislation.

We have identified us as a downstream user as we produce wires, cables and cable harnesses, which according to REACH definition are articles and have therefore no obligation to register our products. In a few cases where we import substances from suppliers outside EU we have a responsibility to ensure that registration is carried out, if applicable.

Habia Cable confirms that the intentional composition of the articles we put on the market do not contain any Substances of Very High Concern (SVHC) mentioned in the candidate list, above a maximum concentration as defined in the REACH Regulation as 0.1% by weight in the articles, except for certain products containing components with cadmium plating. In such cases, and in case of receiving further information from our suppliers regarding presence of substances mentioned in the most recent candidate list, this will be communicated to concerned customers.

We do understand our customers concern that their products can be delivered without interruption, and will do our utmost to ensure that. We do not foresee that the REACH regulation would endanger our possibility to manufacture and deliver products to you in the future.

Habia Cable Group

Carl Modigh  
CEO
